# HOW IT BEGAN

## Leather Made. Since 1994

It is this infatuation with leather that has captured our imaginations from the start. MB Exports International, was founded by Shri Sudhir Sharan Garg in a city called Manchester of INDIA : Kanpur. Inspired by the beauty of the hides, the products had to be genuine. They had to be handcrafted. (Just as they are today.) And they had to be available to the widest range of people while still maintaining the natural qualities that make leather special.

## To the West

In 1994, some adventurous west coasters fell in love with our leather jackets and the journey began and we started exporting leather garments and soon we were preferred suppliers to various brands in United Kingdom and United States of America. We're proud of our part in turning leather into a style staple of our times. Under our present ownership, we've been able to create even better styles and value - all without losing our core commitment to genuine quality leather goods.

## Today

Today, it's that devotion to leather that leads us on still .Our in-house brand MB has been developed keeping few core things in mind – DESIGN, FITTING AND AFFORDABILITY. We've loved it since 1994, and in over 20 years, we've learned more about leather than anyone as a leather goods manufacturer. We're the experts. No one else comes close. Because as we made leather, leather made us.

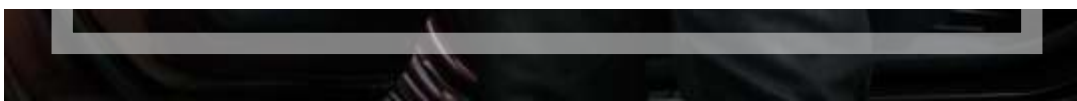

# OUR STORY

## For The Love of Leather

**We're obsessed with leather.**

**The texture, the look, the way it makes you feel, everything is better in leather. Classic leather ages well and gains character with time, like you do, becoming as unique as you.**

★MB★

# LEATHER WITHOUT COMPROMISE

**WATER REPELLENT RIGHT IN THE FIBERS.**

**SO YOU DON'T HAVE TO.**

Our leather is treated right at the time we produce it, removing the hassle of having to apply wax or other water repellents afterwards that can damage the delicate hide.

**MADE FROM  
100% FULL GRAIN SHEEP LEATHER.  
SO SOFT.**

We use full grain sheep leather for its exceptionally soft and velvety texture. This naturally thin material makes for pliable leather with a fine grain, which can be used to make lightweight, supple leather jackets that move with you.

**PROTECT AGAINST  
RAIN, SNOW, SLEET, HAIL, MIST...  
BASICALLY ALL KINDS OF WATER.**

The treated leather allows you the flexibility of wearing your leather jacket anytime you want, in rain or snow or that unexpected shower the weather app sort of mentioned, without the risk of damaging your jacket.
